

Who we are

With more than 300,000 private and commercial customers, Waste Management is New Zealand's leading waste and environmental services provider, driven by our focus on safety, sustainability and service and underpinned by innovation.

Our team of 1,700 see waste as a valuable resource. Using our nationwide network together with 17 materials recovery facilities, we reuse, redirect or recycle waste back into the circular economy.

From greenwaste into compost, to milk bottles into wheelie bins, or old tyres into fuel, the focus is on finding a beneficial, sustainable re-use for waste.

Our focus is on the future, the possibilities it holds and ultimately the protection of it.
